Riccardo Figliozzi

AI Trainer | AI Consultant

Florence, Tuscany, Italy

Summary

Educator and consultant of Data Science, Artificial Intelligence and AI Automation, with specific expertise in implementing LLM models and AI agents.

Experience

Data Masters

AI Teacher / AI Engineer

February 2025 - Present (1 year 7 months)

- Design and development of an agentic chatbot for user onboarding on the Data Masters platform, using LangChain, LangGraph, LangSmith, and ChromaDB (RAG architecture).
- AI automation workflows based on LLMs and agents using n8n: web scraping pipeline → data processing → automated reporting; RAG agent for customer service.
- Teaching generative AI, data science, and machine learning: transferring skills to professionals and companies.

Freelance

AI Adoption Consultant & Trainer

August 2024 - Present (2 years 1 month)

Firenze, Toscana, Italia

- Analyze client business processes to identify automation opportunities through Artificial Intelligence solutions
- Design and develop AI solutions (agents, automation workflows, integrations with low-code/no-code tools, and AI platforms) to support the identified processes
- Utilize and configure key generative AI and automation tools and frameworks (e.g., LLM models, orchestration platforms, RPA, prompt engineering tools)
- Support the team in preparing project proposals and PoCs (Proofs of Concept) for clients
- Collaborate with the project team in the implementation, testing, and deployment of the developed solutions

- Guide the client in the adoption of the new solutions and introduced AI tools
- Continuously monitor the evolution of AI tools and technologies to propose up-to-date and effective solutions
- Prepare technical documentation and project progress reports

Accademia del Levante

Teacher

February 2025 - March 2025 (2 months)

I had the opportunity to contribute to the training of future Data Engineers by teaching the Excel and Statistics modules in a specialized online course. My goal was to provide practical skills and effective strategies for excel and statistical skills, covering both operational tools and fundamental statistical concepts for the field.

Beyond Knowledge

Data Scientist

April 2023 - July 2024 (1 year 4 months)

Firenze

Crafting both classical and advanced machine learning solutions and collaborating with data scientists to identify problems, select algorithms, prepare data, train/evaluate models, and deploy them to production. Additionally, I maintain back-end systems using Django, RestAPI, N8N, and Docker, ensuring seamless integration between ML models and existing systems.

SDG Group Italy

Data Engineer

February 2022 - April 2023 (1 year 3 months)

Florence, Tuscany, Italy

Building and analysing data flows using ETL pipelines and seamlessly migrating them to cloud platforms like AWS. I leverage my expertise in designing and implementing these pipelines to ensure smooth data integration.

OR2S - Observatoire régional de la santé et du social

Data Scientist

April 2021 - October 2021 (7 months)

Rouen, Normandy, France

Developed an automated process using unsupervised machine learning techniques in Python, to extract meaningful insights and patterns from

unlabeled data, leveraging both clustering and dimensionality reduction methods.

ARDOXSO

Search Engine Optimization Copywriter

January 2020 - June 2020 (6 months)

Pisa, Tuscany, Italy

While pursuing my studies in Data Science at the University of Pisa, I simultaneously contributed to Ardoxso's digital marketing campaign as an SEO Copywriter. This dual role allowed me to apply data-driven insights to content creation while enhancing my technical skills.

- Produce SEO-optimized blog posts on various digital marketing topics;
- Leveraged data analysis techniques to identify trending topics and keywords, informing content strategy and improving organic search rankings;
- Utilized web analytics tools to track content performance and iteratively improve SEO strategies.

Studio Legale Cavalletti

Social Media Manager

November 2019 - April 2020 (6 months)

Pisa, Tuscany, Italy

During my time in Pisa, I took on a contract role managing the social media presence for a local lawyer. This position involved overseeing and developing content for both their LinkedIn and Facebook profiles. My responsibilities included:

- Creating and curating professional content tailored to the legal industry
- Regularly updating both platforms with relevant posts and articles
- Analyzing metrics to optimize post performance and reach
- Collaborating with the lawyer to highlight their expertise and services
- Implementing social media marketing strategies to expand their online presence

This experience allowed me to hone my skills in digital marketing within a professional services context, while also gaining insights into the legal field.

Idib Group

Data Analyst

November 2018 - June 2019 (8 months)

Messina, Sicily, Italy

Working with big data by using several tools like Figma, Miro and starting to coding with both R and Python for Business Intelligence and market analysis purposes.

UniVersoMe

Social Media Manager

December 2016 - July 2017 (8 months)

Messina, Sicily, Italy

Social Media Manager of this wonderful university project made by students like me. This experience gave to me the opportunity to grow professionally and personally speaking, improving a lot my creativity and many others soft-skills.

Education
